

July 2008

Significant Planetary Events

Cancer New Moon 1st house:

Plant the seed of intention to let more of your tender side through, not making you uncomfortably vulnerable, just more authentic in your own skin.

Saturn square Neptune [July 5-August 6]:

Dreams and reality collide. Neptune is the dream, Saturn is the translation of the dream into reality. Keep the essence of the dream and make realistic compromises to manifest it. Guard against depression.

Progressed Moon enters 3rd house [July 8-May 2 (2010)]:

Expression in all verbal and written forms is encouraged. New input is needed, from new friends, new activities. Your calendar may start filling up to feed this need for new experiences.

Capricorn Full Moon 7th house square Mars:

Ways that you project your power (especially personal authority) onto others instead of owning it yourself may be illuminated.
